Rochelle –

Hey! Diane is finishing a draft report for WA this week. I would like to read it and edit it before we send it out next week. Then I think we should give the state 2 weeks to review.

For this reason, we don't have anything new to report on the WA project next week and am arguing we can either defer to the next meeting or reschedule it for 3 weeks from tomorrow (since they should have a draft by early next week).

With regards to OR:

We sent a note to Dan about Grande Ronde data he requested (there is none)

We have run taxonomic reconciliation on all the new diatom data; Diane will match to chemistry and we should have a memo on that by the first week in November

I am editing the SEM and SSN memos

So, we should have OR current phase nearly wrapped up by the end of November.

Let us know what you think about WA call for tomorrow. I am happy to chat if there are other reasons to do it, but we don't have any new NSTEPS insights – just writing reports.

Thanks

MP
